ABOUT

Self-motivated and dedicated programmer with extensive experience in web development and database management through independent study and practical projects. Proven ability to manage complex operations and drive business growth in retail environments.

EXPERIENCE

Web Development Intern

Technova || August 2026 – October 2026

Web development company specializing in building custom digital solutions and web applications.

- Assisted in developing, testing, and debugging client-facing web applications to ensure optimal performance.
- Collaborated with senior developers to write clean, maintainable code using modern web technologies.
- Participated in code reviews and technical troubleshooting to resolve front-end and back-end issues.

Freelance Web Developer

Tatbikati Agency | May 2020 – Present

Canadian digital agency specializing in custom web development, graphic design, branding, and social media marketing, delivering innovative solutions to help businesses thrive online.

- Launched and continue to manage Tatbikati, a platform dedicated to creating and deploying custom web applications, resulting in a 30% growth in client base.
- Oversaw all aspects of the business, including product development, client acquisition, project management, and application deployment.
- Utilized advanced programming skills in HTML, CSS, JavaScript, React.js, PHP, Node.js and React Native to design and implement user-centric solutions.
- Implemented SEO strategies that resulted in a 50% increase in unique visitors and a 35% boost in average site session duration.

Web Developer

Asia Mobile Phone | June 2022 – September 2024

Retail company specializing in mobile phones, accessories, and repair services.

- Achieved a **77.78% growth in monthly online orders** by optimizing the website and user experience.
- Developed a custom stocktaking scanner app with barcode/QR integration, increasing inventory accuracy by **85%** and saving **40% of time** on inventory processes.
- Managed web maintenance, updates, and technical troubleshooting to support daily retail operations.

Web Operations Engineer

Aich Leaders Media - Alsyaq News | March 2023 – October 2023

Digital news platform delivering timely and reliable updates on regional and global events.

- Ensured website functionality and performed routine checks for broken links or errors.
- Provided technical support for website-related issues.
- Monitored website performance, speed, and uptime.
- Used analytics tools to track website traffic and user behavior.
- Implemented SEO best practices to improve website visibility.
- Performed regular backups of the website and its data.
